3 Terms and definitions

Add the following new definition:

3.6.2

shot of steam

a single emission of an increased volume of steam from the sole-plate for a short duration

Page 41

25 Assessment of smoothing

25.2 Conditioning of the iron

Replace, on page 43, the last sentence of the last paragraph by the following:

For steam ironing, the water reservoir has to be filled up to the capacity specified by the manufacturer, and the steam supply has to be operated at the maximum steaming rate for $15\text{ s} \pm 1\text{ s}$ before using the iron.
