FOREWORD

This amendment has been prepared by IEC technical committee 61: Safety of household and similar electrical appliances.

The text of this amendment is based on the following documents:

FDIS	Report on voting
61/1632/FDIS	61/1730/RVD

Full information on the voting for the approval of this amendment can be found in the report on voting indicated in the above table.

A bilingual version of this amendment may be issued at a later date.

4 General condition for the tests

4.2 Add the following:

Addition:

NOTE If the test of 21.101 results in a **protective device** becoming open-circuit, the remaining tests are carried out on a separate sample.

11 Heating

11.8 In the addition, add the following to the first paragraph:

However, if a non-metallic hose is covered by textile material, the temperature rise of the surface of the textile material shall not exceed 80 K.
