CONTENTS

FOREWORD.....	4
1 Scope.....	6
2 Normative references.....	6
3 Terms, definitions and acronyms.....	7
4 Documentation requirements	10
5 Resource management.....	10
5.1 Provision of resources for product warranty system.....	10
5.2 Succession planning	10
6 Product realization.....	10
6.1 General.....	10
6.2 Planning of product realization	11
6.3 Determination of requirements related to the product	11
6.4 Review of requirements related to the product	11
6.5 Customer communication	12
6.6 Organization manufacturing feasibility	12
6.7 Design and development	12
6.7.1 Design and development planning	12
6.7.2 Design and development inputs.....	12
6.7.3 Manufacturing process design inputs.....	13
6.7.4 Design and development outputs.....	13
6.7.5 Manufacturing process design outputs.....	13
6.7.6 Design and development validation	13
6.7.7 Control of design and development changes.....	14
6.8 Purchasing.....	14
6.8.1 Purchasing process.....	14
6.8.2 Purchasing information.....	15
6.8.3 Verification of purchasing process	15
6.9 Production and service provision	15
6.9.1 Control of production and service provision	15
6.9.2 Control plan	16
6.9.3 Validation of processes for production and services provisions.....	17
6.9.4 Identification and traceability	17
6.9.5 Customer property	18
6.9.6 Preservation of product	18
6.10 Control of monitoring and measuring equipment.....	18
6.10.1 General	18
6.10.2 Control of performance rating (IV) measurement equipment.....	18
7 Monitoring and measurement.....	19
7.1 Customer satisfaction.....	19
7.2 Monitoring and measurement of a manufacturing process	19
7.3 Monitoring and measurement of product	20
7.4 Ongoing product monitoring.....	20
7.5 Internal audit.....	20
7.6 Control of nonconforming product.....	20
7.6.1 Control of nonconforming product.....	20
7.6.2 Analysis of data	21

7.7	Continual improvement.....	21
7.8	Corrective and preventive action.....	21
Annex A (informative) Correspondence between ISO 9001:2008 and IEC TS 62941		22

INTERNATIONAL ELECTROTECHNICAL COMMISSION

TERRESTRIAL PHOTOVOLTAIC (PV) MODULES – GUIDELINES FOR INCREASED CONFIDENCE IN PV MODULE DESIGN QUALIFICATION AND TYPE APPROVAL

FOREWORD

- 1) The International Electrotechnical Commission (IEC) is a worldwide organization for standardization comprising all national electrotechnical committees (IEC National Committees). The object of IEC is to promote international co-operation on all questions concerning standardization in the electrical and electronic fields. To this end and in addition to other activities, IEC publishes International Standards, Technical Specifications, Technical Reports, Publicly Available Specifications (PAS) and Guides (hereafter referred to as "IEC Publication(s)"). Their preparation is entrusted to technical committees; any IEC National Committee interested in the subject dealt with may participate in this preparatory work. International governmental and non-governmental organizations liaising with the IEC also participate in this preparation. IEC collaborates closely with the International Organization for Standardization (ISO) in accordance with conditions determined by agreement between the two organizations.
- 2) The formal decisions or agreements of IEC on technical matters express, as nearly as possible, an international consensus of opinion on the relevant subjects since each technical committee has representation from all interested IEC National Committees.
- 3) IEC Publications have the form of recommendations for international use and are accepted by IEC National Committees in that sense. While all reasonable efforts are made to ensure that the technical content of IEC Publications is accurate, IEC cannot be held responsible for the way in which they are used or for any misinterpretation by any end user.
- 4) In order to promote international uniformity, IEC National Committees undertake to apply IEC Publications transparently to the maximum extent possible in their national and regional publications. Any divergence between any IEC Publication and the corresponding national or regional publication shall be clearly indicated in the latter.
- 5) IEC itself does not provide any attestation of conformity. Independent certification bodies provide conformity assessment services and, in some areas, access to IEC marks of conformity. IEC is not responsible for any services carried out by independent certification bodies.
- 6) All users should ensure that they have the latest edition of this publication.
- 7) No liability shall attach to IEC or its directors, employees, servants or agents including individual experts and members of its technical committees and IEC National Committees for any personal injury, property damage or other damage of any nature whatsoever, whether direct or indirect, or for costs (including legal fees) and expenses arising out of the publication, use of, or reliance upon, this IEC Publication or any other IEC Publications.
- 8) Attention is drawn to the Normative references cited in this publication. Use of the referenced publications is indispensable for the correct application of this publication.
- 9) Attention is drawn to the possibility that some of the elements of this IEC Publication may be the subject of patent rights. IEC shall not be held responsible for identifying any or all such patent rights.

The main task of IEC technical committees is to prepare International Standards. In exceptional circumstances, a technical committee may propose the publication of a technical specification when

- the required support cannot be obtained for the publication of an International Standard, despite repeated efforts, or
- the subject is still under technical development or where, for any other reason, there is the future but no immediate possibility of an agreement on an International Standard.

Technical specifications are subject to review within three years of publication to decide whether they can be transformed into International Standards.

IEC TS 62941, which is a technical specification, has been prepared by IEC technical committee 82: Solar photovoltaic energy systems.

The text of this standard is based on the following documents:

FDIS	Report on voting
82/994/DTS	82/1049/RVC

Full information on the voting for the approval of this technical specification can be found in the report on voting indicated in the above table.

This publication has been drafted in accordance with the ISO/IEC Directives, Part 2.

The committee has decided that the contents of this publication will remain unchanged until the stability date indicated on the IEC web site under "http://webstore.iec.ch" in the data related to the specific publication. At this date, the publication will be

- Transformed into an International standard
- reconfirmed,
- withdrawn,
- replaced by a revised edition, or
- amended.

A bilingual version of this publication may be issued at a later date.
