tracteur et le véhicule tracté — Dimensions et affectation des contacts*

AMENDEMENT 1

Reference number
ISO 11446:1995/Amd.1:1997(E)

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

Amendment 1 to ISO 11446:1995 was prepared by Technical Committee ISO/TC 22, *Road vehicles*, Subcommittee SC 3, *Electrical and electronic equipment*.

AMENDMENT 1

Page 1, subclause 3.1

Add the following sentence after the third paragraph:

“They shall also be marked on the terminal face, although reduced space available may require smaller size of contact designation numbers at the terminal side.”
