

INTERNATIONAL STANDARD

**ISO
1989**

Second edition
1985-12-15

AMENDMENT 1
1992-11-15

Programming languages — COBOL

AMENDMENT 1: Intrinsic function module

Langages de programmation — COBOL

AMENDEMENT 1: Module de fonction intrinsèque

Reference number
ISO 1989 : 1985/Amd.1 : 1992 (E)

Foreword

ISO (the International Organization for Standardization) and IEC (the International Electrotechnical Commission) form the specialized system for worldwide standardization. National bodies that are members of ISO or IEC participate in the development of International Standards through technical committees established by the respective organization to deal with particular fields of technical activity. ISO and IEC technical committees collaborate in fields of mutual interest. Other international organizations, governmental and non-governmental, in liaison with ISO and IEC, also take part in the work.

In the field of information technology, ISO and IEC have established a joint technical committee, ISO/IEC JTC 1. Draft International Standards adopted by the joint technical committee are circulated to national bodies for voting. Publication as an International Standard requires approval by at least 75 % of the national bodies casting a vote.

Amendment 1 to International Standard ISO 1989 : 1985 was prepared by Joint Technical Committee ISO/IEC JTC 1, *Information technology*.

Programming languages — COBOL

AMENDMENT 1 : Intrinsic function module

The following national standard is adopted as Amendment 1 to ISO International Standard 1989 : 1985:

- ANSI X3.23a-1989, supplement to ANSI X3.23-1985.

NOTE — Copies of the ANSI standard may be obtained through the American National Standards Institute, 11 West 42nd Street, 13th Floor, New York, N.Y. 10036, USA.
