Commercial refrigerated cabinets — Methods of test — Part 3 : Temperature test

AMENDMENT 1

Amendment 1 to International Standard ISO 1992/3-1973 was developed by Technical Committee ISO/TC 86, *Refrigeration*, and was circulated to the member bodies in November 1977.

It has been approved by the member bodies of the following countries :

Bulgaria	Israel	Spain
Czechoslovakia	Italy	Sweden
Finland	Mexico	Switzerland
Germany, F. R.	Poland	United Kingdom
Hungary	Romania	USSR
Ireland	South Africa, Rep. of	Yugoslavia

The member bodies of the following countries expressed disapproval of the document on technical grounds :

Australia
France
New Zealand
USA

Page 1

Sub-clause 3.2, Running in

Insert the following paragraph between the existing second and third paragraphs :

"For cabinets intended to be switched off at night, it is recognized that stable conditions may not be reached. The running-in period shall therefore be at least 2 h and the test period shall commence from the end of the running-in period."

Replace the existing third paragraph by the following :

"Doors or lids on closed cabinets shall be opened through an angle of 90° or fully opened in the case of sliding doors or lids, and then closed again, once every 6 min for 8 consecutive hours. This applies to cabinets intended to be switched off at night which have a test period of 8 h. It also applies to all other cabinets for which the test period is not less than 24 h."
