AMENDMENT 1
2016-03-15

**Space systems — Re-entry risk
management for unmanned spacecraft
and launch vehicle orbital stages**

AMENDMENT 1

*Systèmes spatiaux — Gestion du risque de la rentrée pour les étapes
orbitales des véhicules spatiaux non habités et des lanceurs spatiaux*

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see www.iso.org/patents).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation on the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the WTO principles in the Technical Barriers to Trade (TBT) see the following URL: [Foreword - Supplementary information](#)

The committee responsible for this document is ISO/TC 20, *Aircraft and space vehicles*, Subcommittee SC 14, *Space systems and operations*.

Space systems — Re-entry risk management for unmanned spacecraft and launch vehicle orbital stages

AMENDMENT 1

Page 1, Normative references

Add the following reference:

ISO 10795, *Space systems — Programme management and quality — Vocabulary*

Page 1, Terms and definitions

Replace the introductory text for Terms and definitions with the following:

For the purposes of this document, the terms and definitions given in ISO 10795 and the following apply.

Page 1, Terms and definitions

Replace entry 3.2 with the following:

3.2

launch vehicle orbital stage

stage of a launch vehicle that is designed to achieve orbit

Page 2, Terms and definitions

Replace entry 3.3 with the following:

3.3

re-entry

return of a spacecraft or other man-made space object into the Earth's atmosphere

Page 5, Figure 1

Replace Figure 1 with the following:

Page 6, Clause 7

Delete Clause 7.

Page 10, Clause A.6

Delete Clause A.6.
