Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2. www.iso.org/directives

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received. www.iso.org/patents

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

The committee responsible for this document is ISO/TC 46, *Information and documentation*.

ISO 3166 consists of the following parts, under the general title *Codes for the representation of names of countries and their subdivisions*:

- *Part 1: Country codes*
- *Part 2: Country subdivision code*
- *Part 3: Code for formerly used names of countries*

ISO 3166 was first published in 1974. It was prepared by Technical Committee ISO/TC 46, *Information and documentation*, in collaboration with the following International Organizations: Customs Cooperation Council (CCC), [since 1995: World Customs Organization (WCO)], United Nations Economic Commission for Europe (ECE), Food and Agriculture Organization of the United Nations (FAO), International Atomic Energy Agency (IAEA), International Air Transport Association (IATA), International Chamber of Commerce (ICC), International Chamber of Shipping (ICS), International Federation of Library Associations (IFLA), International Labour Office (ILO), International Telecommunication Union (ITU), International Union of Railways (UIC), United Nations Organization (UN), United Nations Conference on Trade and Development (UNCTAD), Universal Postal Union (UPU), World Intellectual Property Organization (WIPO), and World Health Organization (WHO).

The International Standard was previously published in 1974, 1981, 1988 and 1993 as ISO 3166. In 1997, it was split into three parts. The first edition of the Part 2 was ISO 3166-2:1998.

The second edition of Part 2, ISO 3166-2:2007, was a consolidation of all changes to the lists of ISO 3166-2:1998 agreed to by the ISO 3166/MA¹⁾, published in the ISO 3166-2 Newsletters up to I-9.

The present, third edition of the Part 2, ISO 3166-2:2013, cancels and replaces ISO 3166-2:2007 of which it is a minor revision. It comprises a consolidation of all changes agreed by the ISO 3166/MA and published in the ISO 3166-2 Newsletter II-1 to II-3. This minor revision incorporates the following changes:

- in 6.1, the generic function (update, publish) has replaced mention of the tool (newsletter) for updates to code elements;
- in 7.2, it is clearly stated that the set of code elements in 7.1.4 is not administered, nor maintained by the ISO 3166/MA.

This third edition is simultaneously published with the third edition of Part 1, ISO 3166-1:2013, and the second edition of Part 3, ISO 3166-3:2013.

Avant-propos

L'ISO (Organisation internationale de normalisation) est une fédération mondiale d'organismes nationaux de normalisation (comités membres de l'ISO). L'élaboration des Normes internationales est en général confiée aux comités techniques de l'ISO. Chaque comité membre intéressé par une étude a le droit de faire partie du comité technique créé à cet effet. Les organisations internationales, gouvernementales et non gouvernementales, en liaison avec l'ISO participent également aux travaux. L'ISO collabore étroitement avec la Commission électrotechnique internationale (CEI) en ce qui concerne la normalisation électrotechnique.

Les procédures utilisées pour élaborer le présent document et celles destinées à sa mise à jour sont décrites dans les Directives ISO/CEI, Partie 1. Il convient, en particulier de prendre note des différents critères d'approbation requis pour les différents types de documents ISO. Le présent document a été rédigé conformément aux règles de rédaction données dans les Directives ISO/CEI, Partie 2, www.iso.org/directives.

L'attention est appelée sur le fait que certains des éléments du présent document peuvent faire l'objet de droits de propriété intellectuelle ou de droits analogues. L'ISO ne saurait être tenue pour responsable de ne pas avoir identifié de tels droits de propriété et averti de leur existence. Les détails concernant les références aux droits de propriété intellectuelle ou autres droits analogues identifiés lors de l'élaboration du document sont indiqués dans l'Introduction et/ou sur la liste ISO des déclarations de brevets reçues, www.iso.org/patents.

Les éventuelles appellations commerciales utilisées dans le présent document sont données pour information à l'intention des utilisateurs et ne constituent pas une approbation ou une recommandation.

Le comité chargé de l'élaboration du présent document est l'ISO/TC 46, *Information et documentation*.

L'ISO 3166 comprend les parties suivantes, présentées sous le titre général, *Codes pour la représentation des noms de pays et de leurs subdivisions*:

- *Partie 1: Codes de pays*
- *Partie 2: Code pour les subdivisions de pays*
- *Partie 3: Code pour les noms de pays antérieurement utilisés*

L'ISO 3166 a été publiée pour la première fois en 1974. Elle a été élaborée par le comité technique ISO/TC 46, *Information et documentation*, avec la collaboration des Organisations internationales suivantes: Bureau international du travail (BIT), Conseil de coopération douanière (CCD) [depuis 1995, Organisation mondiale des douanes (OMD)], Chambre de commerce internationale (CCI), Comité économique pour l'Europe des Nations Unies (CEE), Organisation des Nations Unies pour l'alimentation et l'agriculture (FAO), Fédération internationale des associations de bibliothécaires (IFLA), Agence internationale de l'énergie atomique (IAEA), Association du transport aérien international (IATA), Chambre internationale de la marine marchande (ICS), Organisation mondiale de la propriété intellectuelle (OMPI), Organisation mondiale de la santé (OMS), Organisation des Nations Unies (ONU), Conférence des Nations Unies sur le commerce et le développement (UNCTAD), Union internationale des chemins de fer (UIC), Union internationale des télécommunications (UIT), Union postale universelle (UPU).

La Norme internationale était auparavant publiée en 1974, 1981, 1988 et 1993 en tant qu'ISO 3166. En 1997, elle a été divisée en trois parties. La première édition de la partie 2 était l'ISO 3166-2:1998.

La deuxième édition de la partie 2, l'ISO 3166-2:2007, était une consolidation de tous les changements par rapport aux listes de l'ISO 3166-2:1998 acceptés par l'Autorité de mise à jour de l'ISO 3166¹⁾, publiés dans les bulletins *ISO 3166-2* jusqu'à I-9.

La présente troisième édition de la partie 2, ISO 3166-2:2013, annule et remplace l'ISO 3166-2:2007, dont elle constitue une révision mineure, et comprend une consolidation de tous les changements acceptés par l'Autorité de mise à jour de l'ISO 3166, et publiés dans les bulletins II-1 à II-3 de l'ISO 3166-2. Cette révision mineure inclut les changements suivants:

- en 6.1, la fonction générique (mettre à jour, publier) a remplacé la mention d'outil (bulletin) pour mettre à jour les codets;
- en 7.2, il est clairement établi que les ensembles de codets en 7.1.4 ne sont ni administrés, ni maintenus par l'ISO 3166/MA.

Cette troisième édition est publiée simultanément avec la troisième édition de la Partie 2, ISO 3166-2:2013 et avec la deuxième édition de la partie 3, ISO 3166-3:2013.

Introduction

ISO 3166 provides universally applicable coded representations of names of countries (current and non-current), dependencies, and other areas of particular geopolitical interest and their subdivisions.

ISO 3166-1 establishes codes that represent the current names of countries, dependencies, and other areas of particular geopolitical interest, on the basis of lists of country names obtained from the United Nations.

This part, ISO 3166-2, establishes a code that represents the names of the principal administrative divisions, or similar areas, of the countries etc. included in this part of ISO 3166.

ISO 3166-3 establishes a code that represents non-current country names, i.e. the country names deleted from ISO 3166 since its first publication in 1974.

The three parts of ISO 3166 do not express any opinion whatsoever concerning the legal status of any country, dependency, or other area named herein, or concerning its frontiers or boundaries.

NOTE 1 ISO 3166-2 was first published in 1998 and ISO 3166-3 was first published in 1999.

NOTE 2 ISO 3166-2 and ISO 3166-3 are not included in the same document as ISO 3166-1. They are separate parts of ISO 3166.

Introduction

La présente Norme internationale fournit une représentation codée des noms de pays (actuels ou non actuels), dépendances et autres zones d'intérêt géopolitique particulier et de leurs subdivisions, pour une application universelle.

L'ISO 3166-1 établit des codes qui représentent les noms de pays actuels, des dépendances et autres zones d'intérêt géopolitique particulier, basés sur des listes de noms de pays provenant des Nations Unies.

La présente partie, l'ISO 3166-2, établit un code qui représente les noms des divisions administratives ou des zones similaires des pays etc. issus de la présente partie de l'ISO 3166.

L'ISO 3166-3 établit un code pour les noms de pays attestés dans le passé, c'est-à-dire des pays dont les noms ont été supprimés de l'ISO 3166 depuis sa première publication en 1974.

Les trois parties de l'ISO 3166 n'expriment aucune opinion sur le statut légal des pays, des dépendances ou autres zones citées, ou sur la délimitation de leurs frontières ou de leurs limites.

NOTE 1 La première édition de l'ISO 3166-2 a été publiée en 1998 et la première édition de l'ISO 3166-3 a été publiée en 1999.

NOTE 2 L'ISO 3166-2 et l'ISO 3166-3 ne font pas partie du même document que l'ISO 3166-1. Elles forment des parties séparées de l'ISO 3166.

Codes for the representation of names of countries and their subdivisions —

Part 2: Country subdivision code

1 Scope

This part of ISO 3166 establishes a universally applicable code for the representation of the names of principal administrative divisions of countries and territories included in ISO 3166-1. It is intended to be used in conjunction with ISO 3166-1.

Clauses 4 to 7 of this part of ISO 3166 provide the structure for a code for the representation of names of principal administrative divisions, or similar areas, of the countries and geopolitical entities included in ISO 3166-1.

Clause 8 contains a list of names of subdivisions of countries and geopolitical entities, together with the code element developed for each one of them.

2 Normative references

The following referenced documents, in whole or in part, are normatively referenced in this document and are indispensable for its application. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.

ISO 3166-1, *Codes for the representation of names of countries and their subdivisions — Part 1: Country codes*

ISO/IEC 10646:2003, *Information technology — Universal Multiple-Octet Coded Character Set (UCS)*

Codes pour la représentation des noms de pays et de leurs subdivisions —

Partie 2: Code pour les subdivisions de pays

1 Domaine d'application

La présente partie de l'ISO 3166 fournit un code d'application universelle pour la représentation des noms des principales divisions administratives des pays et territoires figurant dans l'ISO 3166-1. Elle est censée être utilisée conjointement à l'ISO 3166-1.

Les Articles 4 à 7 de la présente partie de l'ISO 3166 fournissent la structure d'un code pour la représentation des noms des principales divisions administratives ou territoires semblables des pays et entités géopolitiques inclus dans l'ISO 3166-1.

L'Article 8 comporte une liste des noms de subdivisions de pays et d'entités géopolitiques associés au codet attribué pour chacun d'eux.

2 Références normatives

Les documents suivants, en totalité ou en partie, sont référencés de manière normative dans le présent document et sont indispensables pour son application. Pour les références datées, seule l'édition citée s'applique. Pour les références non datées, la dernière édition du document de référence s'applique (y compris les éventuels amendements).

ISO 3166-1, *Codes pour la représentation des noms de pays et de leurs subdivisions — Partie 1: Codes de pays*

ISO/CEI 10646:2003, *Technologies de l'information — Jeu universel de caractères codés sur plusieurs octets (JUC)*

3 Terms and definitions

For the purposes of this document, the following terms and definitions apply.

3.1

code

set of data transformed or represented in different forms according to a preestablished set of rules

[SOURCE: ISO 5127:2001, 1.1.4.07]

3.2

code element

result of applying a code to an element of a coded set

[SOURCE: ISO/IEC 2382-4:1999, 04.02.04]

Note 1 to entry: In this part of ISO 3166, a code element represents a country subdivision name.

3.3

country subdivision name

name of a unit resulting from the division of a country, dependency, or other area of special geopolitical interest contained in ISO 3166-1

4 Principles for inclusion in the list of country subdivision names

4.1 List and its sources

4.1.1 The list of country subdivision names in this part of ISO 3166 includes those required to satisfy the broadest possible range of applications.

4.1.2 The country subdivision names included in this part of ISO 3166 shall be those that properly reflect the subdivisions of the countries included in ISO 3166-1. Names reflect the complete currently known subdivision of the countries, etc., without overlaps, as notified by the national authorities concerned or otherwise obtained from sources to which reference is given (see Annex A).

4.1.3 A one-to-one correspondence with country names in ISO 3166-1 is maintained; each alpha-2 code element allocated to a country name in ISO 3166-1 is also shown in the list given in Clause 8 in this part of ISO 3166.

3 Termes et définitions

Pour les besoins du présent document, les termes et définitions suivantes s'appliquent.

3.1

code

ensemble de données transformées ou représentées sous différentes formes suivant des règles préétablies

[SOURCE: ISO 5127:2001, 1.1.4.07]

3.2

codet

résultat de l'application d'un code à un élément d'un jeu codé

[SOURCE: ISO/CEI 2382-4:1999, 04.02.04]

NOTE 1 à l'article: Dans la présente partie de l'ISO 3166, un codet représente un nom de subdivision de pays.

3.3

nom de subdivision de pays

nom d'une unité résultant de la division d'un pays, d'une dépendance ou d'un autre territoire d'un intérêt géopolitique particulier figurant dans l'ISO 3166-1

4 Principes d'inclusion dans la liste des noms de subdivisions de pays

4.1 Liste et ses sources

4.1.1 La liste des noms de subdivisions de pays qui figure dans la présente partie de l'ISO 3166 comprend ceux qui s'avèrent nécessaires pour couvrir le plus grand nombre d'applications possibles.

4.1.2 Les noms de subdivisions de pays qui figurent dans la présente partie de l'ISO 3166 doivent être ceux qui correspondent parfaitement aux subdivisions des pays cités dans l'ISO 3166-1. Les noms reflètent la subdivision des pays telle qu'elle est connue actuellement, sans recouvrement géographique, telle que notifiée par les autorités concernées ou obtenues à partir de sources auxquelles il est fait référence (voir Annexe A).

4.1.3 La correspondance exacte avec chacun des noms de pays figurant dans l'ISO 3166-1 est conservée; chaque codet alpha-2 attribué à un nom de pays dans l'ISO 3166-1 figure également dans la liste donnée dans l'Article 8 de la présente partie de l'ISO 3166.

4.1.4 Where different terms are used to categorize country subdivisions, they are included. Country subdivision names are listed within their category. The terms used to describe such categories are those used by the countries concerned, with their approximate equivalents in English and in French, if required and available. In some cases, a subdivision term is consistently included as its omission would change the grammatical form of the subdivision name.

EXAMPLE LT-VL Vilniaus Apskritis

Omitting Apskritis (meaning county in Lithuanian) would result in changing the subdivision name to Vilnius (the city name).

4.1.5 In this part of ISO 3166, whenever several levels occur, the existing relationship between them is documented. Such code elements are shown after the main subdivision names in a separate column.

4.2 Choice of language, romanization, character set

A country's administrative language is a written language used by the administration of the country at the national level.

The country name and the subdivision name of the country are given in the administrative language(s) of the country concerned as expressed in the Latin alphabet, and with the provisions as to character set as stated below.

EXAMPLE DE-BY Bayern (not: Bavaria)

Where the country subdivision names are submitted in non-Roman alphabets, they are shown in this part of ISO 3166 in romanized form, to the extent possible in accordance with the relevant International Standards, especially those which are recommended by the United Nations Expert Group on Geographical names (UNGEGN), or otherwise with indication of the source.

For the country subdivision names listed in this part of ISO 3166, the 26-character Latin alphabet is used, in relevant cases using diacritic signs as contained in the character inventory of ISO/IEC 10646. See 4.4 c).

4.1.4 Les différents termes utilisés pour désigner les catégories de subdivisions de pays sont mentionnés. Les noms de subdivisions de pays sont répertoriés à l'intérieur de leur catégorie. Les termes employés pour décrire de telles catégories sont ceux qu'utilisent les pays concernés; ils sont, si nécessaires, accompagnés d'un équivalent approximatif en anglais et en français. Dans certains cas, le terme qualifiant une subdivision est régulièrement inclus dans le nom, car son omission modifierait la forme grammaticale du nom de la subdivision.

EXEMPLE LT-VL Vilniaus Apskritis

Si on supprime le terme Apskritis (comté en lituanien), le nom de la subdivision devient Vilnius (nom de la ville).

4.1.5 Dans la présente partie de l'ISO 3166, chaque fois que plusieurs niveaux apparaissent, la relation qui existe entre eux est documentée. De tels codets sont reportés après les noms des subdivisions principales dans une colonne séparée.

4.2 Choix de la langue, romanisation, jeu de caractères

Une langue administrative d'un pays est une langue écrite utilisée par l'administration de ce pays au niveau national.

Les noms du pays et des subdivisions de ce pays sont donnés dans la ou les langue(s) administrative(s) du pays concerné, et exprimés en alphabet latin en appliquant, pour le jeu de caractères utilisé, les dispositions définies ci-après.

EXEMPLE DE-BY Bayern (et non Bavière)

Lorsque les noms de subdivisions de pays sont écrits dans un alphabet autre que latin, ils apparaissent dans la présente partie de l'ISO 3166 sous leur forme romanisée la plus conforme possible aux Normes internationales pertinentes, notamment celles qui sont recommandées par le groupe d'experts des Nations Unies pour les noms géographiques (GENUNG), ou autrement avec l'indication de la référence.

Pour les noms de subdivisions de pays répertoriés dans la présente partie de l'ISO 3166, l'alphabet latin de 26 caractères est utilisé avec, dans les cas appropriés, les signes diacritiques figurant dans l'inventaire des caractères de l'ISO/CEI 10646. Voir 4.4 c).

4.3 Special provisions: alternative names

4.3.1 In exceptional cases, variants of the same country subdivision name are shown in square brackets beside that name. However, in the case of several administrative languages, the alphanumeric order of the code elements is considered. The sources of the variants are generally indicated.

4.3.2 In cases where country subdivision names exist in more than one administrative language, these may be shown with the same code element. The language used is indicated by the relevant ISO 639-1 two-letter code element, if it exists.

4.4 Presentation of the list

The list of countries is arranged in alphabetical order of the ISO 3166-1 alpha-2 country code elements. For each country, the alphabetical order of country subdivision names is the one provided by the country concerned or the one indicated in the list source of the relevant country, retaining any articles before the name. For each country name the list contains the following:

a) a header which shows

- 1) the ISO 3166-1 alpha-2 code element for the country,
- 2) the name of the country in English and French as set out in ISO 3166-1,
- 3) the name of the country in each of the administrative languages of the country concerned (followed by the corresponding ISO 639-1 code element), as set out in ISO 3166-1,
- 4) a description of the subdivision of the country with the relevant term in English, in French and in the administrative language, with the corresponding counters,
- 5) reference to the source of the information,
- 6) when required, reference to the romanization system used, specification of alphabetical order for sorting, etc.,
- 7) remarks, if any;

4.3 Clauses spéciales: autres dénominations

4.3.1 Dans des cas exceptionnels, des variantes dans la dénomination d'une même subdivision de pays figurent entre crochets à côté de ce nom. Toutefois, l'ordre alphanumérique des codets est pris en compte lorsqu'il y a plusieurs langues administratives. Les sources des variantes sont généralement indiquées.

4.3.2 Lorsque les noms de subdivisions de pays existent dans plusieurs langues administratives, ces noms peuvent figurer avec le même codet. La langue employée est indiquée par le codet à deux lettres correspondant de l'ISO 639-1 lorsqu'il existe.

4.4 Présentation de la liste

La liste des pays est présentée selon l'ordre alphabétique des codets de pays alpha-2 de l'ISO 3166-1. Au sein de chaque pays, l'ordre alphabétique des noms de subdivisions de pays est celui que fournit le pays concerné ou celui qui est indiqué dans la source de la liste du pays en question, les articles étant conservés devant le nom. Pour chaque nom de pays, la liste comporte:

a) un en-tête indiquant

- 1) le codet alpha-2 de l'ISO 3166-1 pour le pays,
- 2) le nom du pays en anglais et en français comme indiqué dans l'ISO 3166-1,
- 3) le nom du pays dans chacune des langues administratives du pays concerné (suivi du codet ISO 639-1 correspondant), comme indiqué dans l'ISO 3166-1,
- 4) une description de la subdivision du pays avec le terme approprié en anglais, en français, et dans la langue administrative avec les compteurs correspondants,
- 5) une référence à la source de l'information,
- 6) si nécessaire, référence au système de romanisation, spécification de l'ordre alphabétique pour le classement, etc.,
- 7) des remarques, le cas échéant;

b) a listing of such other level divisions of the country which may be referred to after each subdivision name as a code element in column 3, see c) below;

c) a list of subdivisions, headed with the term describing the type of subdivision, if there are more than one, and with

1) two mandatory columns:

- i) **column 1** showing the code element allocated to each subdivision name (see 5.2);
- ii) **column 2** showing the country subdivision names in the administrative language of the country concerned, where relevant with diacritic signs according to ISO/IEC 10646:2003, Tables 2, 3, 4, 6, 58 and 59. This column can be divided into columns 2 a) and 2 b), etc., in cases where there is more than one administrative language or more than one romanization system;

EXAMPLE 1

1	2a	2b
AT-2	Kärnten	
FI-LL	Lapin lääni (fi)	Lapplands län (sv)

- 2) one optional column 3 stating the code of another level of regional subdivision not used as part of the subdivision code element.

EXAMPLE 2

1	2	3
FR-01	Ain	V

5 Principles for allocation of (country subdivision) code elements

5.1 Relationship to national or international code systems

It is desirable that country subdivision code elements allocated in this part of ISO 3166 reflect code systems already established nationally or internationally. If the ISO 3166/MA has not been notified of code elements, it allocates appropriate code elements (see Clause 6). These code elements are marked by an asterisk. The sources used by the ISO 3166/MA are included in the lists.

b) une liste répertoriant des autres niveaux de division différents d'un pays qui peuvent être cités en référence après chaque nom de subdivision représentés par un codet dans la colonne 3, voir c) ci-dessous;

c) une liste des subdivisions précédée du terme décrivant le type de subdivision, s'il y en a plusieurs, et accompagnée

1) de deux colonnes obligatoires:

- i) **colonne 1** indiquant le codet attribué à chaque nom de subdivision (voir 5.2);
- ii) **colonne 2** indiquant les noms de subdivisions de pays dans la langue administrative du pays concerné avec signes diacritiques, le cas échéant, conformément à l'ISO/CEI 10646:2003, Tableaux 2, 3, 4, 6, 58 et 59. Il est possible de diviser cette colonne en 2 a) et 2 b), etc. dans les cas où il y a plusieurs langues administratives ou plusieurs systèmes de romanisation;

EXEMPLE 1

1	2a	2b
AT-2	Kärnten	
FI-LL	Lapin lääni (fi)	Lapplands län (sv)

- 2) d'une colonne 3 optionnelle indiquant le code d'un niveau différent de subdivision régionale non utilisé comme partie du codet de la subdivision.

EXEMPLE 2

1	2	3
FR-01	Ain	V

5 Principes d'attribution des codets (pour subdivisions de pays)

5.1 Relations avec les systèmes de codification nationaux et internationaux

Il est souhaitable que les codets des subdivisions de pays attribués dans la présente partie de l'ISO 3166 correspondent aux systèmes de codification déjà établis aux niveaux national et international. Lorsqu'aucun codet n'a été indiqué, l'ISO 3166/MA attribue les codets appropriés (voir l'Article 6). Ces codets sont marqués par un astérisque. Les sources utilisées par l'ISO 3166/MA figurent dans les listes.

5.2 Structure of country subdivision code elements

The country subdivision code elements shall have a maximum length of six characters (including the separator). The coding structure is as follows:

- a) the first two characters are the alpha-2 country code element provided in ISO 3166-1;
- b) the alpha-2 country code element is followed by a hyphen and the code element of the country subdivision name;
- c) the code element designating the country subdivision name shall consist of one, two or three alphabetical and/or numeric characters.

6 Maintenance

6.1 Maintenance Agency (ISO 3166/MA)

The Maintenance Agency (ISO 3166/MA) established by the ISO Council to maintain ISO 3166, and operating in accordance with guidelines approved by the Council has the following specific function with regard to ISO 3166-2:

- a) to add and to delete country subdivision names and assign code elements as needed, in accordance with the rules provided;
- b) to advise users and ISO member bodies regarding application of the codes;
- c) to update lists of country subdivision names and their code elements;
- d) to maintain a reference list of all code elements for country subdivision names used in this part of ISO 3166, and their periods of validity;
- e) to publish changes made to the current version of this part of ISO 3166;
- f) to administer the reservation of code elements.

Changes to this part of ISO 3166 are the responsibility of the ISO 3166/MA and become effective immediately upon publication. They are authoritative amendments which form an integral part of this part of ISO 3166.

5.2 Structure des codets des subdivisions de pays

La longueur maximale des codets des subdivisions de pays est de six caractères, séparateur inclus. La structure de codage est la suivante:

- a) les deux premiers caractères correspondent au codet alpha-2 indiqué dans l'ISO 3166-1;
- b) le codet alpha-2 est suivi d'un tiret et du codet du nom de la subdivision du pays;
- c) le codet désignant le nom de la subdivision du pays ne doit comporter qu'un, deux ou trois caractères alphabétiques et/ou numériques.

6 Mise à jour

6.1 Autorité de mise à jour (l'ISO 3166/MA)

Dans le cadre de l'ISO 3166-2, l'Autorité de mise à jour (ISO 3166/MA) mise en place par le Conseil de l'ISO pour mettre à jour l'ISO 3166 et qui fonctionne conformément aux directives approuvées par le Conseil, doit remplir les fonctions particulières suivantes:

- a) ajouter et supprimer des noms de subdivision et attribuer des codets, si nécessaire, conformément aux règles fixées;
- b) conseiller les utilisateurs et les organes membres de l'ISO eu égard à l'application des codes;
- c) mettre à jour les listes des noms des subdivisions de pays et de leurs codets;
- d) tenir à jour une liste de référence de tous les codets associés aux noms des subdivisions de pays utilisés dans la présente partie de l'ISO 3166 et surveiller leurs périodes de validité;
- e) publier les changements apportés à la version actuelle de la présente partie de l'ISO 3166;
- f) gérer la réservation de codets.

Les changements de la présente partie de l'ISO 3166 sont sous la responsabilité de l'ISO 3166/MA et prennent effet dès leur publication. Partie intégrante de la présente partie de l'ISO 3166, ces amendements font autorité.

The criteria given in 6.2 to 6.4, shall be observed by the ISO 3166/MA in making changes to the list of country subdivision names in this part of ISO 3166 and their code elements, and for reservations of code elements.

6.2 Changes of country subdivision names

All additions, deletions and alterations in the list of country subdivision names shall be made on the basis of information identified in 4.1.

6.3 Alterations to country subdivision code elements

The Maintenance Agency shall endeavour to maintain stability in the lists of code elements. A significant change of a country subdivision name may require the ISO 3166/MA to alter the code element after appropriate consultation with the authorities concerned.

6.4 Reservation of code elements for country subdivision names

Code elements that have been changed should not be reallocated for a period of at least 50 years after the change. The exact period is determined in each case on the basis of the extent to which the previous code element was used.

Code elements may be reserved, in exceptional cases, for country subdivision names which the ISO 3166/MA has decided not to include in this part of ISO 3166 but for which an interchange requirement exists. Before such code elements are reserved, advice from the relevant authority shall be sought.

A list of reserved code elements and a record of changes shall be kept by the ISO 3166/MA Secretariat.

Les critères donnés de 6.2 à 6.4 doivent être respectés par l'ISO 3166/MA pour les changements de la liste des noms des subdivisions de pays dans la présente partie de l'ISO 3166 et de leurs codets, ainsi que pour les réservations de codets.

6.2 Changement des noms des subdivisions de pays

Tout ajout, retrait ou changement dans la liste des noms des subdivisions de pays doit se faire en fonction des informations données en 4.1.

6.3 Changement des codets de subdivisions de pays

L'Autorité de mise à jour doit s'efforcer de veiller à la stabilité de la liste des codets. Il est possible que, lors d'un changement important de nom des subdivisions de pays, l'ISO 3166/MA soit obligée de modifier le codet après avoir consulté, comme il se doit, les autorités concernées.

6.4 Réservation des codets pour les noms des subdivisions de pays

Il convient de ne pas réattribuer les codets qui ont été modifiés pour une période minimale de 50 ans après le changement. La période exacte est déterminée au cas par cas en fonction du degré d'utilisation du précédent codet.

Dans des cas exceptionnels, il est possible de réserver des codets pour les noms des subdivisions de pays que l'ISO 3166/MA a décidé de ne pas intégrer dans la présente partie de l'ISO 3166 mais au sujet desquels il existe un besoin d'échange. Avant que de tels codets soient réservés, l'autorité compétente doit être consultée pour avis.

La liste des codets réservés et un enregistrement des changements doivent être tenus par le secrétariat de l'ISO 3166/MA.

7 Guidelines for users

7.1 Special provisions

7.1.1 General

Users sometimes need to extend or alter the use of country subdivision code elements for special purposes. The following provisions give guidance for meeting such needs within the framework of this part of ISO 3166.

7.1.2 Subsets

If users do not need to use the entire list of country subdivision names from this part of ISO 3166, they may select those that they require to create their own subset.

7.1.3 Aggregations

In the exceptional case that users need to group together country subdivision names included in this part of ISO 3166 and they require a code element to represent this aggregation, they should do so in accordance with 7.1.5.

7.1.4 User-assigned code elements

If users need code elements to represent country subdivision names not included in this part of ISO 3166, they should avoid code elements already allocated. These users should inform the ISO 3166/MA of any code elements selected.

7.1.5 Redefinitions

If, in exceptional cases, a user finds that the meaning of an existing code element from this part of ISO 3166 needs to be redefined, the ISO 3166/MA should be consulted.

7.2 Advice regarding use

The ISO 3166/MA is available for consultation on the use of country subdivision names in coded form.

7 Principes directeurs pour les utilisateurs

7.1 Clauses spéciales

7.1.1 Généralités

Les utilisateurs ont parfois besoin d'étendre ou de modifier l'utilisation des codets de subdivisions de pays en vue d'objectifs particuliers. Les clauses suivantes constituent des principes directeurs permettant que de tels besoins puissent être satisfaits dans le cadre de la présente partie de l'ISO 3166.

7.1.2 Sous-ensembles

Si les utilisateurs n'ont pas besoin d'utiliser l'intégralité de la liste des noms des subdivisions de pays figurant dans la présente partie de l'ISO 3166, il leur est possible de choisir ceux qui leur sont nécessaires pour créer leur propre sous-ensemble.

7.1.3 Regroupements

Dans le cas exceptionnel où les utilisateurs ont besoin de regrouper des noms des subdivisions de pays figurant dans la présente partie de l'ISO 3166 et d'un codet correspondant à ce regroupement, il leur est possible de le faire conformément au 7.1.5.

7.1.4 Codets attribués aux utilisateurs

Si des utilisateurs ont besoin de codets pour représenter des noms de subdivisions de pays ne figurant pas dans la présente partie de l'ISO 3166, il convient qu'ils évitent de choisir des codets déjà attribués et qu'ils fassent part à l'ISO 3166/MA de tout codet retenu.

7.1.5 Redéfinitions

Si, dans des cas exceptionnels, un utilisateur estime que la signification d'un codet existant de la présente partie de l'ISO 3166 a besoin d'être redéfinie, il convient de consulter l'ISO 3166/MA.

7.2 Conseils relatifs à l'utilisation

Il est possible de demander conseil à l'ISO 3166/MA pour l'utilisation des noms des subdivisions de pays sous forme codée.

Law 1991-12-11; ISO 3166/MA (*)

Remarks: In the autonomous communities of Galicia, Catalonia and the Balearics, the respective regional languages are the sole official languages of toponymy. Old toponymic Castilian language forms are given in square brackets for information.

For the toponyms of the autonomous communities of Navarra, Valencia and the Basque Country, the regional language has co-official status with Castilian. Toponymic regional language forms having equal status to that of Castilian are given after a slash mark (in accordance with the official Spanish form of presentation).

SE SWEDEN / SUÈDE

Sverige (sv)

21 counties (en) / département (fr) / län (sv)

List source: Statistics Sweden, SCB, 2013.

http://www.lantmateriet.se/Global/Kartor%20och%20geografisk%20information/Ortnamn/Dokument/2012/Toponymic_Guidelines_2007_6%5B1%5D.pdf

Code source: Statistics Sweden, SCB, 2013

Remark: Alphabetic and numeric codes co-exist. The alphabetic code is traditionally well known to the general public, whereas the numeric code (placed in a separate column within square brackets) is used mainly within national administration; it may in the longer term supersede the alphabetic code.

Remarque: Les codes alphabétiques et numériques coexistent. Le code alphabétique est traditionnellement bien connu du grand public alors que le code numérique (placé dans une colonne séparée, entre crochets) est utilisé principalement par les administrations nationales. Ce dernier pourrait remplacer, à long terme, le code alphabétique.
