Descriptors : clothing, gloves, dimensions, designation, labelling.

FOREWORD

ISO (the International Organization for Standardization) is a worldwide federation of national standards institutes (ISO member bodies). The work of developing International Standards is carried out through ISO technical committees. Every member body interested in a subject for which a technical committee has been set up has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the technical committees are circulated to the member bodies for approval before their acceptance as International Standards by the ISO Council.

International Standard ISO 4418 was developed by Technical Committee ISO/TC 133, *Sizing systems and designations for clothes*, and was circulated to the member bodies in September 1977.

It has been approved by the member bodies of the following countries :

Australia	Ireland	South Africa, Rep. of
Canada	Israel	Spain
Finland	Japan	Sweden
France	Netherlands	Turkey
Hungary	New Zealand	U.S.A.
India	Poland	U.S.S.R.
Iran	Romania	Yugoslavia

The member bodies of the following countries expressed disapproval of the document on technical grounds :

Germany
Switzerland
United Kingdom

Size designation of clothes – Gloves

0 INTRODUCTION

This International Standard is one of a series which deals essentially with the size designation of clothing, and is not directly concerned with sizing systems as such.

The primary aim of this and other International Standards in this series is the establishment of a size designation system that indicates (in a simple, direct and meaningful manner) the body size of the person that a garment is intended to fit. Provided that the shape of the person's body (as indicated by the appropriate dimensions) has been accurately determined, this system will facilitate the choice of garments that fit.

The size designation system is based on body and not garment measurements. Choice of garment measurements is normally left to the designer and the manufacturer, who are concerned with style, cut and other fashion elements, and who must make due allowance for garments normally worn beneath a specific garment.

Definitions and body measurement procedure are prescribed in ISO 3635, which is applicable to all categories of clothing.

1 SCOPE AND FIELD OF APPLICATION

This International Standard establishes a system of designating the sizes of gloves.

Both the control dimensions on which the size designation system is based, and the method of indicating the size designation on a garment label, are laid down.

2 REFERENCE

This International Standard should be read in conjunction with the following International Standard :

ISO 3635, *Size designation of clothes – Definitions and body measurement procedure.*

3 CONTROL DIMENSIONS

The control dimensions shall be as follows :

- a) Hand girth at knuckles.
- b) Hand length.

4 SIZE DESIGNATION

4.1 The size designation shall comprise the control dimensions (see clause 3), in centimetres, of the intended wearer of that garment. The relevant control measurements shall be given, preferably preceded by the descriptive words "hand girth" (at knuckles) and "hand length", in that order.

NOTE — The above requirements shall not preclude the use, in exceptional instances and as specified by the national standards organization concerned, of

- a) size designations comprising only one of the applicable control dimensions;
- b) size designations shown as a range by stating the minimum and maximum control measurements separated by an oblique stroke or a hyphen.

4.2 Garment measurements shall not be incorporated in the size designation but, where considered of value, garment measurements may be indicated separately (see 5.3).

5 LABELLING

5.1 Method

The size designation of each garment shall be indicated clearly, conspicuously and in plainly legible form on a label, or on a swing ticket, or on both.

5.2 Attachment

The label or swing ticket shall be securely attached to the garment and so positioned as to be easily readable.

5.3 Additional information

Information additional to the size designation may be separately indicated on the label, or on the swing ticket, or on both, provided that it does not in any way reduce the prominence and conspicuousness of the size designation. Such additional information may include a size code number or garment measurements considered to constitute useful information.
