AMENDMENT 1
2012-04-15

**Acoustics — Measurements of sound
pressure level emitted by stationary
road vehicles**

AMENDMENT 1

*Acoustique — Mesurages du niveau de pression acoustique émis par
les véhicules routiers en stationnement*

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

International Standards are drafted in accordance with the rules given in the ISO/IEC Directives, Part 2.

The main task of technical committees is to prepare International Standards. Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights.

Amendment 1 to ISO 5130:2007 was prepared by Technical Committee ISO/TC 43, *Acoustics*, Subcommittee SC 1, *Noise*.

Acoustics — Measurements of sound pressure level emitted by stationary road vehicles

AMENDMENT 1

page 1, Scope

Add the following sentence after the first paragraph:

“Vehicles with no combustion operation at stationary conditions are not within the scope of this International Standard.”

page 3, 5.1, paragraph 1

In the first sentence, add “with no appreciable level of porosity” after “dense asphalt” to read as follows.

A suitable test site shall be outdoors and consist of a level concrete, dense asphalt with no appreciable level of porosity or similar hard material flat surface, free from snow, grass, loose soil, ashes or other sound-absorbing material.

[PTO

page 4, 6.3, Figure 1

Replace Figure 1 by the following

Key

- T top view
- S side view
- 1 reference point
- 2 road surface
- A mitered pipe
- B bent down pipe
- C straight pipe
- D vertical pipe
