Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

International Standards are drafted in accordance with the rules given in the ISO/IEC Directives, Part 2.

The main task of technical committees is to prepare International Standards. Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights.

Amendment 2 to ISO 6405-2:1993 was prepared by Technical Committee ISO/TC 127, *Earth-moving machinery*, Subcommittee SC 3, *Operation and maintenance*.

Earth-moving machinery — Symbols for operator controls and other displays —

Part 2:

Specific symbols for machines, equipment and accessories

AMENDMENT 2: Additional symbols

Clause 13

Add the following excavator/backhoe equipment symbols below those added to the same clause by ISO 6405-2:1993/Amd.1:1997.

Symbol number	Symbol form/shape	Symbol description/application	ISO/IEC registration number
13.24		Excavator/backhoe — Power boost	ISO 7000-2637
13.25		Excavator/backhoe — Work mode selector	ISO 7000-2638

Clause 21

Add the following entirely new clause below the Clause 20 added by ISO 6405-2:1993/Amd.1:1997.

21 Hydraulic cylinder

Symbol number	Symbol form/shape	Symbol description/application	ISO/IEC registration number
21.1		Hydraulic cylinder — Lock	ISO 7000-2642
21.2		Hydraulic cylinder — Unlock	ISO 7000-2643
