Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards institutes (ISO member bodies). The work of developing International Standards is carried out through ISO technical committees. Every member body interested in a subject for which a technical committee has been set up has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the technical committees are circulated to the member bodies for approval before their acceptance as International Standards by the ISO Council.

International Standard ISO 6489/2 was developed by Technical Committee ISO/TC 23, *Tractors and machinery for agriculture and forestry*, and was circulated to the member bodies in November 1978.

It has been approved by the member bodies of the following countries :

Australia	India	South Africa, Rep. of
Austria	Italy	Spain
Belgium	Kenya	Switzerland
Bulgaria	Korea, Dem. P. Rep. of	Turkey
Chile	Korea, Rep. of	United Kingdom
Czechoslovakia	New Zealand	USSR
Denmark	Portugal	
Germany, F. R.	Romania	

The member bodies of the following countries expressed disapproval of the document on technical grounds :

France
Poland
USA

Agricultural vehicles — Mechanical connections on towing vehicles —

Part 2 : Clevis type — Dimensions

1 Scope and field of application

This International Standard specifies the dimensional requirements for a clevis type coupling on agricultural towing vehicles for making the mechanical connection with towed vehicles fitted with a ring type hitch coupling complying with ISO 5692.

2 Reference

ISO 5692, *Agricultural vehicles — Mechanical connections on towed vehicles — Hitch ring — Specifications.*
