Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular, the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see www.iso.org/patents).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation of the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT), see www.iso.org/iso/foreword.html.

This document was prepared by Technical Committee ISO/TC 145, *Graphical symbols*, Subcommittee SC 2, *Safety identification, signs, shapes, symbols and colours*.

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at www.iso.org/members.html.

Graphical symbols — Safety colours and safety signs — Registered safety signs

AMENDMENT 2

IMPORTANT — The colours represented in the electronic file of this document can be neither viewed on screen nor printed as true representations. For the purposes of colour matching, see ISO 3864-4 which provides colorimetric and photometric properties together with, as a guideline, references from colour order systems.

Add the following safety signs:

- E064: First aid responder,
- F017: Firefighters' lift,
- M055: Keep out of reach of children,
- W071: Warning; Substance or mixture presenting a health hazard,
- W072: Warning; Substance or mixture that can cause an environmental hazard.

All safety signs are available on the ISO Online browsing platform at <https://www.iso.org/obp>.

Safety sign E064: First aid responder

	Reference No. ISO 7010-E064
	Referent First aid responder
	Function To indicate a person trained in first aid
	Image content Upper human figure with arm band at right arm, first aid cross
Hazard Not being able to identify or locate a first aid responder	
Human behaviour that is intended to be caused after understanding the safety sign's meaning Being aware of the location of a first aid responder	
Additional information The first aid cross may be replaced with another element appropriate to cultural requirements of the target group. Test data obtained according to ISO 9186-1 are not available. Consequently, a supplementary text sign shall be used to increase comprehension except when the safety sign is supplemented by manuals, instructions or training.	

Safety sign F017: Firefighters' lift

	Reference No. ISO 7010-F017
	Referent Firefighters' lift
	Function To indicate the location of a firefighters' lift and associated switch
	Image content Outline of lift human head (left-hand profile, outlined) wearing fire helmet, flame determinant
Hazard Not being able to locate a firefighters' lift and associated switch	
Human behaviour that is intended to be caused after understanding the safety sign's meaning Being aware of the location of a firefighters' lift and associated switch	
Additional information Test data obtained according to ISO 9186-1 are not available. Consequently, a supplementary text sign shall be used to increase comprehension except when the safety sign is supplemented by manuals, instructions or training.	

Safety sign M055: Keep out of reach of children

	Reference No. ISO 7010-M055
	Referent Keep out of reach of children
	Function To signify that the item must be kept out of the reach of children
	Image content Child reaching out for an item that an adult holds above the child's head, arrow pointing upwards
Hazard Some items can be hazardous to children, resulting in serious injury or death if accessed by the child Human behaviour that is intended to be caused after understanding the safety sign's meaning Adults keeping the item out of the reach of children Additional information Test data obtained according to ISO 9186-1 are available from more than one country. Findings from testing showed that the safety sign exceeded the criteria of acceptability. A supplementary text sign may be used to increase comprehension. If the safety sign is supplemented by manuals, instructions or training, a supplementary text sign may not be required.	

Safety sign W071: Warning; Substance or mixture presenting a health hazard

	Reference No. ISO 7010-W071
	Referent Warning; Substance or mixture presenting a health hazard
	Function To warn of a substance or mixture presenting a health hazard
	Image content Human head, torso with characterized deterioration of chest area
Hazard Specific health hazards associated with substances or mixtures	
Human behaviour that is intended to be caused after understanding the safety sign's meaning Avoiding any possibility to have contact with or spills of substances or mixtures considered hazardous to health	
Additional information This safety sign applies to substances and mixtures classified according to GHS (Globally Harmonized System of Classification and Labelling of Chemicals). Test data obtained according to ISO 9186-1 are not available. Consequently, a supplementary text sign shall be used to increase comprehension except when the safety sign is supplemented by manuals, instructions or training.
