Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

International Standards are drafted in accordance with the rules given in the ISO/IEC Directives, Part 2.

The main task of technical committees is to prepare International Standards. Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights.

ISO 7047 was prepared by Technical Committee ISO/TC 2, *Fasteners*, Subcommittee SC 11, *Fasteners with metric external thread*.

This third edition cancels and replaces the second edition (ISO 7047:1994), of which it constitutes a minor revision.

Raised countersunk head screws (common head style) with type H or type Z cross recess — Product grade A

1 Scope

This International Standard specifies the characteristics of countersunk raised head screws of product grade A, with threads from M1,6 to M10 inclusive and with type H or type Z cross recess.

If, in special cases, specifications other than those listed in this International Standard are required, they can be selected from existing International Standards, for example ISO 261, ISO 888, ISO 898-1, ISO 965-2 and ISO 3506-1.

2 Normative references

The following referenced documents are indispensable for the application of this document. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.

ISO 225, *Fasteners — Bolts, screws, studs and nuts — Symbols and descriptions of dimensions*

ISO 261, *ISO general purpose metric screw threads — General plan*

ISO 898-1, *Mechanical properties of fasteners made of carbon steel and alloy steel — Part 1: Bolts, screws and studs with specified property classes — Coarse thread and fine pitch thread*

ISO 965-2, *ISO general purpose metric screw threads — Tolerances — Part 2: Limits of sizes for general purpose external and internal screw threads — Medium quality*

ISO 3269, *Fasteners — Acceptance inspection*

ISO 3506-1, *Mechanical properties of corrosion-resistant stainless steel fasteners — Part 1: Bolts, screws and studs*

ISO 4042, *Fasteners — Electroplated coatings*

ISO 4757, *Cross recesses for screws*

ISO 4759-1, *Tolerances for fasteners — Part 1: Bolts, screws, studs and nuts — Product grades A, B and C*

ISO 6157-1, *Fasteners — Surface discontinuities — Part 1: Bolts, screws and studs for general requirements*

ISO 8839, *Mechanical properties of fasteners — Bolts, screws, studs and nuts made of non-ferrous metals*

ISO 8992, *Fasteners — General requirements for bolts, screws, studs and nuts*

ISO 10683, *Fasteners — Non-electrolytically applied zinc flake coatings*

ISO 16048, *Passivation of corrosion-resistant stainless-steel fasteners*

3 Dimensions

See Figure 1 and Table 1. Symbols and descriptions of dimensions are specified in ISO 225.

The shank diameter is approximately equal to the pitch diameter or equal to the permissible major thread diameter.

Key

- 1 as-rolled end
- 2 edge (rounded or flat)

Figure 1

Table 1 (continued)

Dimensions in millimetres

Thread, d			M1,6	M2	M2,5	M3	(M3,5) ^a	M4	M5	M6	M8	M10
d^b			Approximate mass, in kilograms per 1 000 pieces ($\rho = 7,85 \text{ kg/dm}^3$) (for information only)									
nom.	min.	max.										
(55)	54,05	55,95								11	21,3	33,2
60	59,05	60,95								11,9	22,9	35,7
NOTE Preferred lengths are those between the solid, bold, stepped lines.												
^a Sizes in parentheses should be avoided if possible. ^b P is the pitch of the thread. ^c See ISO 7721. ^d Screws with nominal lengths above the bold, discontinuous line are threaded up to the head; $b = l - (k + a)$.												

4 Specifications and reference International Standards

See Table 2.

Table 2 — Specifications and reference International Standards

Material		Steel	Stainless steel	Non-ferrous metal
General requirements	International Standard	ISO 8992		
	Tolerance class	6g		
Thread	International Standard	ISO 261, ISO 965-2		
	Property class	4.8	A2-50, A2-70	—
Mechanical property	International Standard	ISO 898-1	ISO 3506-1	ISO 8839
	Product grade	A		
Tolerance	International Standard	ISO 4759-1		
	International Standard	ISO 4757		
Cross recess	International Standard	ISO 4757		
	International Standard	ISO 4757		
Finish — Coating	International Standard	As processed		
	International Standard	As processed		
Surface integrity	International Standard	As processed		
	International Standard	As processed		
Acceptability	International Standard	As processed		
	International Standard	As processed		

5 Designation

EXAMPLE A cross-recessed countersunk raised head screw with thread M5, nominal length $l = 20$ mm, property class 4.8 and cross recess type Z is designated as follows:

Countersunk raised head screw ISO 7047 - M5 × 20 - 4.8 - Z
