Foreword

ISO (the International Organization for Standardization) and IEC (the International Electrotechnical Commission) form the specialized system for worldwide standardization. National bodies that are members of ISO or IEC participate in the development of International Standards through technical committees established by the respective organization to deal with particular fields of technical activity. ISO and IEC technical committees collaborate in fields of mutual interest. Other international organizations, governmental and non-governmental, in liaison with ISO and IEC, also take part in the work.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular, the different approval criteria needed for the different types of document should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO and IEC shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see www.iso.org/patents) or the IEC list of patent declarations received (see <http://patents.iec.ch>).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation of the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT) see www.iso.org/iso/foreword.html.

This document was prepared by Technical Committee ISO/IEC JTC 1, *Information technology*, Subcommittee SC 23, *Digitally recorded media for information interchange and storage*.

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at www.iso.org/members.html.

Information processing — Volume and file structure of CD-ROM for information interchange

AMENDMENT 2

12.3.1

Add subclause title as follows:

Primary volume descriptor, path table record and directory record

12.3.2

Add subclause title as follows:

Supplementary volume descriptor and enhanced volume descriptor

12.3.3

Add subclause title as follows:

Volume partition descriptor

12.3.4

Add subclause title as follows:

Boot record

12.3.5

Add subclause title as follows:

Extended attribute record

13.3.1

Add subclause title as follows:

Implementation

13.3.2

Add subclause title as follows:

Descriptor information

B.2

Add the following sentence after the last paragraph:

The Joliet specification is available at: <https://standards.iso.org/iso/9660/ed-1/en/amd/2>.
