FOREWORD

ISO (the International Organization for Standardization) is a worldwide federation of national standards institutes (ISO Member Bodies). The work of developing International Standards is carried out through ISO Technical Committees. Every Member Body interested in a subject for which a Technical Committee has been set up has the right to be represented on that Committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the Technical Committees are circulated to the Member Bodies for approval before their acceptance as International Standards by the ISO Council.

International Standard ISO 97 was drawn up by Technical Committee ISO/TC 72, *Textile machinery and accessories*, and circulated to the Member Bodies in August 1974.

It has been approved by the Member Bodies of the following countries:

Belgium	Netherlands	Turkey
France	Poland	United Kingdom
Germany	Romania	U.S.S.R.
India	Switzerland	Yugoslavia

No Member Body expressed disapproval of the document.

This International Standard cancels and replaces ISO Recommendation R 97-1959, of which it constitutes a technical revision.

Textile machinery and accessories — Rings for spinning, doubling and twisting for ear-shaped travellers

1 SCOPE AND FIELD OF APPLICATION

This International Standard lays down the dimensions of rings for spinning, doubling and twisting for ear-shaped travellers "HZ", "HZCH" and "J".
