Foreword

ISO (the International Organization for Standardization) and IEC (the International Electrotechnical Commission) form the specialized system for worldwide standardization. National bodies that are members of ISO or IEC participate in the development of International Standards through technical committees established by the respective organization to deal with particular fields of technical activity. ISO and IEC technical committees collaborate in fields of mutual interest. Other international organizations, governmental and non-governmental, in liaison with ISO and IEC, also take part in the work.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular, the different approval criteria needed for the different types of document should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives or www.iec.ch/members_experts/refdocs).

7.4 Naming of characters

In the paragraph after list item g), replace the sentence as follows:

Some characters may have one or more alternate names, called character name aliases. See 7.5.

Introduce a new sub-clause 7.5 with a new Table 2, renumbering the following tables and sub-clauses as appropriate.

7.5 Character name aliases

This document has a mechanism for the publication of additional, normative formal aliases for characters. These formal aliases are known as character name aliases. They function essentially as auxiliary names for a character. Their main usage is to provide correction for known mistakes in character names, but they have other usages such as providing string identifiers for control functions. Character name aliases are listed in the file NameAliases.txt (see Clause 2). That file also documents the 'type' field which distinguishes among different kinds of character name aliases, as shown in Table 2.

Table 2: Types of character name aliases

Type	Description
correction	Corrections for mistakes in the character names which cannot be fixed after publication of the standard
control	ISO/IEC 6429 names for C0 and C1 control functions, and other commonly occurring names for these control functions
alternate	Widely used alternate names for format characters
figment	Several documented labels for C1 control code points which were never actually approved in any standard
abbreviation	Commonly occurring abbreviations or acronyms for control functions, format characters, spaces and variation selectors

Character name aliases follow the same rules as character names. See Clause 27.

8 Revision and updating of the UCS

Remove the NOTE which is superseded by sub-clause 7.5.

11 UCS Encoding schemes

11.5 UTF-16

Replace the third paragraph as follows:

In the absence of signature or a higher-level protocol, the octet order of the UTF-16 encoding scheme is that the more significant octet precedes the less significant octet.

12 Use of control functions with the UCS

Replace NOTE 3 with the following text and note:

Control functions have associated string identifiers specified by the 'control' type in the file Name-sAliases.txt (see Clause 2). Many of these control functions have multiple identifiers based on various environments.

NOTE 3: For example, the control characters 000E and 000F are named SHIFT-OUT and SHIFT-IN respectively in a 7-bit environment and LOCKING-SHIFT ONE and LOCKING-SHIFT ZERO respectively in an 8-bit environment.

17.6 Variation selector and variation sequences

17.6.1 General

In the second paragraph, replace 'three Mongolian Free Variation Selectors (FVS1 to FVS3)' by 'four Mongolian Free Variation Selectors (FVS1 to FVS4)'.

17.6.2 Standardized variations sequences

In the list item describing Mathematical symbols, remove the note and add the following sentence after 'Mathematical symbol':

Some variation sequences are used to describe a graphic variant while others are used to describe style variant such as Chancery style versus roundhand style.

Add a new list item after CJK Unified Ideographs:

- Egyptian hieroglyphs. Each of these variation sequences correspond to a rotated Egyptian hieroglyph (90, 180, and 270 degrees).

In the first paragraph, update the link with following:

<https://standards.iso.org/iso-iec/10646/ed-6/en/amd/1/UCSVariants.txt>

24.3 Source reference presentation for CJK UNIFIED IDEOGRAPHS block

24.3.1 General

Replace the first sentence of second paragraph as follows:

The graphic representation for the radical is shown immediately below the code point, along with the radical number, optionally followed by an apostrophe for simplified radicals, and the stroke count.

In last sentence of last paragraph, replace 'G, T, J, K, KP, V, H, M, and U' with 'G, T, J, K, KP, V, H, M, U, UK, and S'.

24.3.2 Source reference presentation for CJK UNIFIED IDEOGRAPHS

Replace the two first paragraphs with the following:

For the presentation of the CJK UNIFIED IDEOGRAPH block, the graphic representations for the Hanzi G, H, and T sources, the Kanji J source, the Hanja K source, and the ChuNom V source are shown in that order when present in a first row. That row is not shown if none of these sources are specified for that code point. An optional second row may be displayed to show the Hanzi M source, the Unicode U sources, the UK UK source, and the SAT S source. Because at least one of these ten sources (G, H, T, J, K, V, M, U, UK, and S) exists for any code point in that block, there is always one row visible for each code point in that block. The KP source glyphs are not show for that block for lack of suitable font.

Figure 2 shows an example for characters 4E00-4E09 and 4E14-4E1C.

Rename the sub-clause (now 24.3.4) as 'Source reference presentation for CJK UNIFIED IDEOGRAPHS EXTENSION B, C, D, E, F, G, and H'.

Replace the first paragraph with the following:

For the presentation of the CJK UNIFIED IDEOGRAPH EXTENSION B, C, D, E, F, G, and H blocks, up to two sources per characters are represented in a single row. If more than two sources exist, additional rows are used.

Update the Figure 5 title with following:
