10.2	Nonconformity and corrective action	41
10.3	Continual improvement	42
Annex A (informative)	Information relevant to particular Types of Protection and specific Ex Products	43
A.1	Overview	43
A.2	General	43
A.3	Ex d – Flameproof enclosures covered by IEC 60079-1	43
A.3.1	Verification	43
A.3.2	Castings	43
A.3.3	Machining	44
A.3.4	Cemented joints and potted assemblies	44
A.3.5	Routine overpressure testing	44
A.3.6	Flanged joints	45
A.3.7	Elements, with non-measurable paths, of breathing and draining devices	45
A.4	Ex i – intrinsic safety covered by IEC 60079-11	46
A.4.1	Components for intrinsically safe products	46
A.4.2	Printed circuit boards (PCB)	46
A.4.3	Sub-assemblies and assemblies	47

A.4.4	Enclosures for Group III or reduced spacing	47
A.4.5	Routine verifications and tests	48
A.4.6	Intrinsically safe circuits and assemblies incorporated in Ex equipment of other types of protection	48
A.5	Ex e – Increased safety covered by IEC 60079-7	48
A.5.1	Ingress protection (IP)	48
A.5.2	Internal wiring and contact integrity	48
A.5.3	Rotating machines	48
A.5.4	Windings	49
A.5.5	Terminal boxes	49
A.5.6	Cable Glands, terminals and other accessories	49
A.5.7	Routine verifications and tests	49
A.6	Ex p – Pressurized equipment covered by IEC 60079-2	49
A.6.1	Ingress protection (IP)	49
A.6.2	Components and manufacturing process	49
A.6.3	Components, constructional characteristics	50
A.6.4	Routine verifications and tests	50
A.7	Ex m – Encapsulation covered by IEC 60079-18	50
A.7.1	Production documentation	50
A.7.2	Routine verifications and tests	50
A.8	Ex o – Liquid immersion covered by IEC 60079-6	50
A.8.1	Material control	50
A.8.2	Filling	51
A.8.3	Ingress protection	51
A.8.4	Routine verifications and tests	51
A.9	Ex q – Powder filling covered by IEC 60079-5	51
A.9.1	Material control	51
A.9.2	Filling	51
A.9.3	Ingress protection (IP)	51
A.9.4	Routine verifications and tests	51
A.10	Equipment covered by IEC 60079-15	52
A.10.1	General requirements	52
A.10.2	Ex nA – Non sparking equipment	52
A.10.3	Ex nC – Sealed devices	52
A.10.4	Ex nR – Restricted Breathing	52
A.11	Ex t – Dust ignition protection by enclosure covered by IEC 60079-31	53
A.11.1	Casting	53
A.11.2	Enclosure parts	53
A.11.3	Gaskets	53
A.11.4	Protection devices	53
A.11.5	Cemented and cast enclosure parts	53
A.11.6	Ingress protection (IP)	54
A.11.7	Routine verifications and tests	54
A.12	Ex op – Optical radiation covered by IEC 60079-28	54
A.13	Gas detectors covered by IEC 60079-29	54
A.14	Ex h – Non-electrical Equipment covered by ISO 80079-36	55
A.14.1	General	55
A.14.2	Non-metallic parts	55
A.14.3	Casing and external parts	55

A.14.4	Earthing and equipotential bonding of conductive parts	55
A.14.5	Light transmitting parts	55
A.14.6	Ingress protection (IP)	56
A.15	Non Electrical Equipment protected by constructional safety “c” covered by ISO 80079-37	56
A.15.1	General	56
A.15.2	Metal-based material	56
A.15.3	Machining	56
A.15.4	Cemented joints and potted assemblies	56
A.15.5	Assembling	57
A.15.6	Routine tests	57
A.15.7	Power transmission systems	57
A.16	Non-electrical equipment protected by control of ignition sources “b” covered by ISO 80079-37	57
A.16.1	General	57
A.16.2	Ignition protection system	57
A.16.3	Assembling	57
A.16.4	Routine verifications and tests	58
A.17	Non-electrical equipment protected by liquid immersion “k” covered by ISO 80079-37	58
A.17.1	General	58
A.17.2	Protective liquid	58
A.17.3	Casing	58
A.17.4	Measuring or indicating devices	58
A.18	Flame arresters covered by ISO 16852	58
Annex B (informative)	Verification criteria for elements with non-measurable paths used as an integral part of a Type of Protection	60

INTERNATIONAL ELECTROTECHNICAL COMMISSION

EXPLOSIVE ATMOSPHERES –

Part 34: Application of quality management systems for Ex Product manufacture

FOREWORD

- 1) The International Electrotechnical Commission (IEC) is a worldwide organization for standardization comprising all national electrotechnical committees (IEC National Committees). The object of IEC is to promote international co-operation on all questions concerning standardization in the electrical and electronic fields. To this end and in addition to other activities, IEC publishes International Standards, Technical Specifications, Technical Reports, Publicly Available Specifications (PAS) and Guides (hereafter referred to as “IEC Publication(s)”). Their preparation is entrusted to technical committees; any IEC National Committee interested in the subject dealt with may participate in this preparatory work. International, governmental and non-governmental organizations liaising with the IEC also participate in this preparation. IEC collaborates closely with the International Organization for Standardization (ISO) in accordance with conditions determined by agreement between the two organizations.
- 2) The formal decisions or agreements of IEC on technical matters express, as nearly as possible, an international consensus of opinion on the relevant subjects since each technical committee has representation from all interested IEC National Committees.
- 3) IEC Publications have the form of recommendations for international use and are accepted by IEC National Committees in that sense. While all reasonable efforts are made to ensure that the technical content of IEC Publications is accurate, IEC cannot be held responsible for the way in which they are used or for any misinterpretation by any end user.
- 4) In order to promote international uniformity, IEC National Committees undertake to apply IEC Publications transparently to the maximum extent possible in their national and regional publications. Any divergence between any IEC Publication and the corresponding national or regional publication shall be clearly indicated in the latter.
- 5) IEC itself does not provide any attestation of conformity. Independent certification bodies provide conformity assessment services and, in some areas, access to IEC marks of conformity. IEC is not responsible for any services carried out by independent certification bodies.
- 6) All users should ensure that they have the latest edition of this publication.
- 7) No liability shall attach to IEC or its directors, employees, servants or agents including individual experts and members of its technical committees and IEC National Committees for any personal injury, property damage or other damage of any nature whatsoever, whether direct or indirect, or for costs (including legal fees) and expenses arising out of the publication, use of, or reliance upon, this IEC Publication or any other IEC Publications.
- 8) Attention is drawn to the Normative references cited in this publication. Use of the referenced publications is indispensable for the correct application of this publication.
- 9) Attention is drawn to the possibility that some of the elements of this IEC Publication may be the subject of patent rights. IEC shall not be held responsible for identifying any or all such patent rights.

International Standard ISO/IEC 80079-34 has been prepared by subcommittee 31M: Non-electrical equipment and protective systems for explosive atmospheres of IEC technical committee 31: Equipment for explosive atmospheres.

This second edition cancels and replaces the first edition, published in 2011, and constitutes a full technical revision.

The significant changes with respect to the previous edition should be considered as minor technical revisions. However, the clause numbering in regard to the previous edition has changed in order to be in line with ISO 9001:2015. The normal “Table of Significant Changes” has not been included for this reason.

This publication is published as a double logo standard.

This standard should be read in conjunction with ISO 9001:2015.

In order to help the reader, the text of the applicable sections of ISO 9001:2015 is reproduced in a rectangular box. Where clauses are referenced within a rectangular box these refer to ISO 9001:2015.

The text of this International standard is based on the following documents:

FDIS	Report on voting
31M/130/FDIS	31M/135/RVD

Full information on the voting for the approval of this International Standard can be found in the report on voting indicated in the above table.

This document has been drafted in accordance with the ISO/IEC Directives, Part 2.

A list of all parts of the IEC 60079 series, under the general title *Explosive atmospheres*, as well as the ISO/IEC 80079 series, can be found on the IEC website.

The committee has decided that the contents of this document will remain unchanged until the stability date indicated on the IEC website under "<http://webstore.iec.ch>" in the data related to the specific document. At this date, the document will be

- reconfirmed,
- withdrawn,
- replaced by a revised edition, or
- amended.

INTRODUCTION

This part of ISO/IEC 80079 specifies requirements for a quality management system that can be used by an organization for the manufacture of Ex Products.

It can also be used by third parties including certification bodies, to assess the organization's ability to meet conformity assessments system requirements and/or regulatory requirements.

The application of this document is intended to cover both electrical and non-electrical equipment, protective systems, safety devices, Ex Components and their combinations. The detailed content (e.g. annexes) is currently focused on the established documents.

Quality requirements are an integral part of most certification schemes and as such this document has been prepared with the IECEx system requirements in mind, is intended to support ATEX Directive requirements for quality management system and can be applied in other national or regional certification schemes that relate to the manufacture of Ex Products.

In Annex D there is a correlation matrix regarding ISO/IEC 80079-34:2011 to ISO/IEC 80079-34:2018.

EXPLOSIVE ATMOSPHERES –

Part 34: Application of quality management systems for Ex Product manufacture

1 Scope

This document specifies particular requirements and information for establishing and maintaining a quality management system to manufacture Ex Products in accordance with the certificates. While it does not preclude the use of other quality management systems that are compatible with the objectives of ISO 9001:2015 and which provide equivalent results, the minimum requirements are given in this document.

2 Normative references

The following documents are referred to in the text in such a way that some or all of their content constitutes requirements of this document. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.

IEC 60050-426, *International Electrotechnical Vocabulary – Part 426: Equipment for explosive atmospheres*

IEC 60079-0, *Explosive atmospheres – Part 0: Equipment – General requirements*

ISO 9000, *Quality management systems – Fundamentals and vocabulary*

ISO 9001:2015, *Quality management systems – Requirements*
