## BRIEF HISTORY

The ISO Recommendation R 1062, *Common names for pesticides – Fourteenth list*, was drawn up by Technical Committee ISO/TC 81, *Common names for pesticides*, the Secretariat of which is held by the British Standards Institution (BSI).

Work on this question led, in 1966, to the adoption of a Draft ISO Recommendation.

In November 1967, this Draft ISO Recommendation (No. 1508) was circulated to all the ISO Member Bodies for enquiry. It was approved, subject to a few modifications of an editorial nature, by the following Member Bodies :

|                |                |                       |
|----------------|----------------|-----------------------|
| Australia      | France         | Portugal              |
| Austria        | Germany        | South Africa, Rep. of |
| Belgium        | Greece         | Sweden                |
| Brazil         | India          | Switzerland           |
| Canada         | Iran           | Turkey                |
| Chile          | Israel         | United Kingdom        |
| Colombia       | Italy          | U.S.A.                |
| Czechoslovakia | Korea, Rep. of | U.S.S.R.              |
| Denmark        | New Zealand    | Yugoslavia            |

One Member Body opposed the approval of the Draft :

Ireland

The Draft ISO Recommendation was then submitted by correspondence to the ISO Council which decided, in April 1969, to accept it as an ISO RECOMMENDATION.

## COMMON NAMES FOR PESTICIDES

## FOURTEENTH LIST\*

## FOREWORD

This ISO Recommendation gives the fourteenth list of common names approved by Technical Committee ISO/TC 81, *Common names for pesticides*, for certain pesticides of international importance. The chemical name in conformity with the rules of the International Union of Pure and Applied Chemistry (IUPAC) is given in each case, the one preferred by Chemical Abstracts being given first where appropriate; other chemical names commonly used are often included as well. Chemical structures are given together with notes concerning some of the names. The use of each compound is given in a separate column according to the following classification :

|              |   |   |                         |   |   |
|--------------|---|---|-------------------------|---|---|
| Acaricides   | — | A | Molluscicides           | — | M |
| Bactericides | — | B | Nematicides             | — | N |
| Fungicides   | — | F | Plant growth regulators | — | P |
| Herbicides   | — | H | Rodenticides            | — | R |
| Insecticides | — | I | Avicides                | — | V |

It is proposed in due course to issue further ISO Recommendations for approved common names. In some cases, widely used names are not available for international use at the present time, because they are protected by trade marks in certain countries.

\* The previously issued lists constitute the subject-matter of the following ISO Recommendations :

- ISO/R 116, *Common names for pesticides* — First list
- ISO/R 219, *Common names for pesticides* — Second list
- ISO/R 258, *Common names for pesticides* — Third list
- ISO/R 290, *Common names for pesticides* — Fourth list
- ISO/R 411, *Common names for pesticides* — Fifth list
- ISO/R 566, *Common names for pesticides* — Sixth list
- ISO/R 628, *Common names for pesticides* — Seventh list
- ISO/R 785, *Common names for pesticides* — Eighth list
- ISO/R 967, *Common names for pesticides* — Ninth list
- ISO/R 968, *Common names for pesticides* — Tenth list
- ISO/R 969, *Common names for pesticides* — Eleventh list
- ISO/R 970, *Common names for pesticides* — Twelfth list
- ISO/R 971, *Common names for pesticides* — Thirteenth list

(1) Use : H — Herbicides.

(2) The name "asulam" is not acceptable for use in Germany as it is in conflict with the registered trade mark "Azulon".

(3) The name "benazolin" is not acceptable for use in Germany, as it is in conflict with the registered trade mark "Benavin".

(4) The name "chlorflurazole" is not acceptable for use in Germany, owing to possible confusion with the common names "chlorflurenol" and "flurenol".

(5) It should be stated which ester is present, for example, chlorthal-methyl.

(6) The name "chlorthal" is not acceptable for use in the U.S.A. owing to the possibly misleading chemical significance of the syllable "al".
