AEROSPACE INFORMATION REPORT

SAE AIR1169

REV.
A

Issued 1970-11-15
Revised 1990-05-24

Superseding AIR1169

Submitted for recognition as an American National Standard

BIBLIOGRAPHY OF REFERENCES PERTAINING TO THE EFFECTS OF OXYGEN ON IGNITION AND COMBUSTION OF MATERIALS

AIR PRODUCTS INC.: "Cryogenic Safety," Air Products Inc., Allentown, PA, 1959.
145 p., 61 references.

AMERICAN INSURANCE ASSOCIATION: Engineering and Safety Dept., Div. of Technical
Services, 85 John St., New York City 10038: "Fire, Explosion & Health
Hazards of Organic Peroxides." Research Report No. 11, 1966 Revision. 90 p,
34 references.

ARVIDSON, J.M. and BRENNAN, J.A.: Cryogenics Division, Institute Basic
Standards, National Bureau of Standards, 1975. Boulder, Colorado.

ASTM: "Standard Guide for Designing System for Oxygen Service," ASTM G 88 - 84,
Nov. 1984 (design guide, oxygen service, standard, oxygen safety, oxygen
compatibility, fire).

ASTM: "Standard Guide for Evaluating Nonmetallic Materials for Oxygen Service,"
ASTM G 63 - 83a (materials compatibility, fire oxygen design guide, standard
materials selection).

ASTM: "Standard Test Method for Autogenous Ignition Temperature of Liquids and
Solids in a High-Pressure Oxygen-Enriched Environment," ASTM G 72 - 82 (high
pressure oxygen, fire ignition, oxygen enriched design guide, standard).

ASTM: "Standard Test Method for Determining Ignition Sensitivity of Materials to
Mechanical Impact," ASTM G 86 - 84, April 1984 (ignition sensitivity, oxygen
mechanical impact tests, design guide, standard).

ASTM: "Standard Test Method for Ignition Sensitivity of Materials to Gaseous
Fluid," ASTM G 74 - 82, Feb. 1983 (ignition, oxygen safety, fire design
guide, standard, dynamic pressure impact test).

SAE Technical Board Rules provide that: "This report is published by SAE to advance the state of technical and engineering sciences. The use of this report is entirely voluntary, and its applicability and suitability for any particular use, including any patent infringement arising therefrom, is the sole responsibility of the user."

SAE reviews each technical report at least every five years at which time it may be reaffirmed, revised, or cancelled. SAE invites your written comments and suggestions.
