Plastic Tubing, Electrical Insulation
Non-Crosslinked Polyvinyl Chloride, Flexible, Heat Shrinkable
1.6 to 1 Shrink Ratio

RATIONALE

AMS3579D has been reaffirmed to comply with the SAE five-year review policy.

1. SCOPE:

1.1 Form:

This specification covers a non-crosslinked polyvinyl chloride plastic in the form of flexible, thinwall, heat-shrinkable tubing with a low recovery temperature.

1.2 Application:

These products have been used typically as a flexible, electrical insulation tubing whose diameter can be reduced to a predetermined size by heating to 150 °C (302 °F) or higher, but usage is not limited to such applications. This tubing is stable for continuous exposure from -20 to +105 °C (- 4 to +221 °F).

1.3 Safety Hazardous Materials:

While the materials, methods, applications, and processes described or referenced in this specification may involve the use of hazardous materials, this specification does not address the hazards which may be involved in such use. It is the sole responsibility of the user to ensure familiarity with the safe and proper use of any hazardous materials and to take necessary precautionary measures to ensure the health and safety of all personnel involved.

2. APPLICABLE DOCUMENTS:

The following publications form a part of this specification to the extent specified herein. The applicable issue of referenced publication shall be the issue in effect on the date of the purchase order.

SAE Technical Standards Board Rules provide that: "This report is published by SAE to advance the state of technical and engineering sciences. The use of this report is entirely voluntary, and its applicability and suitability for any particular use, including any patent infringement arising therefrom, is the sole responsibility of the user."

SAE reviews each technical report at least every five years at which time it may be revised, reaffirmed, stabilized, or cancelled. SAE invites your written comments and suggestions.

3. TECHNICAL REQUIREMENTS:

3.1 Material:

Shall be a non-crosslinked, thermally-stabilized, flame-resistant, modified polyvinyl chloride.

3.2 Color:

Shall be black.

3.3 Properties:

Tubing shall conform to the following requirements; reported values shall be the average of all specimens tested for each requirement. Tests shall be performed in accordance with ASTM D 2671 insofar as practicable.

- 3.3.1 Recovered Tubing: The requirements shown in Table 1 apply to tubing after being shrunk by heating to $150\text{ }^{\circ}\text{C} \pm 5$ ($302\text{ }^{\circ}\text{F} \pm 10$) in a convection-current air oven with an air velocity of 100 to 200 feet per minute (0.5 to 1.0 m/sec) past the tubing, holding at heat for not less than three minutes, removing from the oven, and conditioning for not less than four hours at $23\text{ }^{\circ}\text{C} \pm 2$ ($73\text{ }^{\circ}\text{F} \pm 4$) and 45 to 55% relative humidity:

TABLE 1 - Properties After Being Heat Shrunk

	Property	Requirement	Test Method
3.3.1.1	Tensile Strength, min Jaw separation rate 20 inches per minute (8.5 mm/s)	2000 psi (14 MPa)	ASTM D 2671
3.3.1.2	Elongation, min	200%	ASTM D 2671
3.3.1.3	Secant Modulus at 2% Strain, max	15,000 psi (103 MPa)	ASTM D 2671
3.3.1.4	Dielectric Strength, min	In accordance with Table 2	4.5.1
3.3.1.5	Volume Resistivity, min	1011 ohm-cm	ASTM D 2671
3.3.1.6	Flammability (Burning Time), max	15 seconds	4.5.2
3.3.1.6.1	Flammability, (UL Subject 224), min	Pass VW-1 rating	ANSI/UL 224-VW-1
3.3.1.7	Fungus Resistance	Rating of 1 or less	ASTM G 21
3.3.1.8	Low-Temperature Flexibility at -10 °C ± 1 (14 °F ± 2)	No Cracking	ASTM D 2671
3.3.1.9	Heat Aging, 400 hours ± 2 at 130 °C ± 2 (266 °F ± 4)		ASTM D 2671
3.3.1.9.1	Elongation, min	150%	ASTM D 2671
3.3.1.10	Corrosion, 168 hours ± 2 at 135 °C ± 2 (275 °F ± 4)	Pass	ASTM D 2671 Method B
3.3.1.11	Solvent Resistance		4.5.3
3.3.1.11.1	Tensile Strength, min	1800 psi (12.4 MPa)	
3.3.1.11.2	Dielectric Strength, min	70% of value determined in 3.3.1.4	
3.3.1.12	Dimensional Change on Heating		ASTM D 2671
3.3.1.12.1	Diametral	In accordance with Table 3	
3.3.1.12.2	Longitudinal, max	+1%, -25%

- 3.3.2 Expanded Tubing: Requirements shown in Table 4 apply to tubing in the expanded (as received) condition. Heating for the tests of 3.3.2.1 and 3.3.2.2 shall be performed in an oven in accordance with 3.3.1.

TABLE 4 - Properties in the Expanded (As-Received) Condition

	Property	Requirement	Test Method
3.3.2.1	Heat Shock at 180 °C ± 5 (356 °F ± 10)	No dripping, flowing, or cracking	ASTM D 2671
3.3.2.1.1	Bending after Heat Shock	No cracks	4.5.4
3.3.2.2	Restricted Shrinkage, After 30 minutes ± 1 at 135 °C ± 2 (275 °F ± 4)	No cracks; withstand 2000 V for 1 minute	ASTM D 2671 (Procedure C)
3.3.2.3	Specific Gravity, max	1.40	ASTM D 2671
3.3.2.4	Water Absorption, max 24 hours ± 0.25 at 25 °C ± 2 (77 °F ± 4)	1.00%	ASTM D 2671

3.4 Marking:

Tubing, prior to and after shrinkage, shall be suitable for having numbers or characters printed on it with conventional tube marking techniques.

3.5 Quality:

Tubing, as received by purchaser, shall be uniform in quality and condition, clean, smooth, and free from foreign materials and from imperfections detrimental to usage of the tubing.

3.6 Standard Sizes and Tolerances:

Tubing shall be supplied in lengths shown in 5.2.1, and in the standard sizes and to the tolerances shown in Table 3. Tolerances apply at 23 to 30 °C (73 to 86 °F). Measurements shall be made in accordance with ASTM D 2671.

4. QUALITY ASSURANCE PROVISIONS:

4.1 Responsibility for Inspection:

The manufacturer of tubing shall supply all samples and shall be responsible for all required tests. Purchaser reserves the right to sample and to perform any confirmatory testing deemed necessary to ensure that the tubing conforms to the requirements of this specification.

4.2 Classification of Tests:

- 4.2.1 Acceptance Tests: Conformance to requirements for tensile strength (3.3.1.1), elongation (3.3.1.2), secant modulus (3.3.1.3), flammability (3.3.1.6), dimensional change on heating (3.3.1.12), heat shock (3.3.2.1), and sizes and tolerances (3.6) are classified as acceptance tests and shall be performed on each lot.
- 4.2.2 Periodic Tests: Conformance to requirements for dielectric strength (3.3.1.4), volume resistivity (3.3.1.5), fungus resistance (3.3.1.7), low-temperature flexibility (3.3.1.8), heat aging (3.3.1.9), corrosion (3.3.1.10), solvent resistance (3.3.1.11), restricted shrinkage (3.3.2.2), specific gravity (3.3.2.3), water absorption (3.3.2.4), and marking (3.4) are periodic tests and shall be performed at a frequency selected by the manufacturer unless frequency of testing is specified by purchaser.
- 4.2.3 Preproduction Tests: All technical requirements of this specification are preproduction tests and shall be performed prior to or on the initial shipment of tubing by the manufacturer, when a change in material, processing, or both requires reapproval as in 4.4.2, and, when purchaser deems confirmatory testing to be required.
- 4.2.3.1 For direct U.S. Military procurement, substantiating test data and, when requested, preproduction test material shall be submitted to the cognizant agency as directed by the procuring activity, contracting officer, or request for procurement.

4.3 Sampling and Testing:

Shall be in accordance with ASTM D 2671.

- 4.3.1 A lot shall be all tubing of the same size from the same production run presented for manufacturer's inspection at one time. The number of determinations for each requirement shall be as specified in the applicable test procedure or, if not specified therein, not less than three.
- 4.3.1.1 Acceptance Tests: Not less than 16 feet (15 m) of tubing from each lot.
- 4.3.1.2 Periodic Tests: Not less than 50 feet (115 m) of tubing of each size or size range. Certain representative sizes may be used to demonstrate conformance of a range of sizes in accordance with Table 5.

TABLE 5 - Representative Sizes

Representative Size	Ranges of Sizes
1/4	3/64 - 1/4, incl
1	3/8 - 1, incl
4	1 1/2 - 4, incl

- 4.3.1.3 A statistical sampling plan, acceptable to purchaser, may be used in lieu of sampling as in 4.3.1.
- 4.3.1.4 Preproduction Tests: Acceptable to purchaser.
