RATIONALE

AMS4271 is a new specification for 2024-T861 bare sheet and plate to facilitate cancellation of AMS-QQ-A-250/4.

1. SCOPE

1.1 Form

This specification covers an aluminum alloy in the form of sheet and plate supplied in the -T861 temper.

1.2 Application

These products have been used typically for structural parts requiring a combination of high strength and good corrosion resistance and whose fabrication does not involve welding, but usage is not limited to such applications.

2. APPLICABLE DOCUMENTS

The issue of the following documents in effect on the date of the purchase order forms a part of this specification to the extent specified herein. The supplier may work to a subsequent revision of a document unless a specific document issue is specified. When the referenced document has been cancelled and no superseding document has been specified, the last published issue of that document shall apply.
